

Done The Experiment Which Best Extreme Root Of That 6 Standard Level Theoretical Approach For Scientist New Reveal Brain Cognition ?

Mantu Kumar Satyam

Ex student M.SC CRRA , From SMU-DE, WEB-smude.edu.in, India. Pass year-2013 ,

Abstracts:

If we done any research , first primary important the main key of evolution of best type brain biochemical's , after then finds best results of any research .

Done the experiment its 6 standard theoretical approach for scientist brain cognition which best root ? The roots mentions are 1. Complex reasoning ,numerical extreme practice without solution book as think to think like one complex reasoning give 30-45 minutes to think to think brain twist all dimensions of till the research work do but not use students to more waste of time 2. By see solution book complex numerical ,reasoning's extreme practice step understandings after the memorize practice like single time 3-4 repeat to upgrade brain software regular update till research work do 3. Use exercise as catalyst 2 -3 hours or maximum neuron-plasticity (ROM) . With attach two methods apply (a) Standard level reasoning's, numerical (b) above mention extreme level . Also its try to encode work in extreme neuron-plasticity boundary cases. 4. Also separate the reasoning's and numerical 5.Back generation best skill till presents, apply above mention 4 in experiments. 6. Brain cognition herbal top 5 with standard level reasoning think ,practice.

By experiment root it confirms that which best of new successful research. After the find by experiment that's best roots apply that's of society ,race , country development. Also consider for experimental error to apply best logic ,both.

Its work during about 3-4 hour job period to update.

Key words: Main ,key ,evolution , brain,6 root ,complex , reasoning ,numerical, note book ,practice , think ,exercise ,2-3 hours ,maximum ROM,try ,saturation

I. INTRODUCTION /MAIN TEXT-

If we done any research , first primary important the main key of evolution of best type brain biochemical's , after then finds best results of any research .

Done the experiment its 6 standard theoretical approach for scientist brain cognition which best root ? The roots mentions are 1. Complex reasoning ,numerical extreme practice without solution book as think to think like one complex reasoning give 30-45 minutes to think to think brain twist all dimensions of till the research work do but not use students to more waste of time 2. By see solution book complex numerical ,reasoning's extreme practice step understandings after the memorize practice like single time 3-4 repeat to upgrade brain software regular update till research work do 3. Use exercise as catalyst 2 -3 hours or maximum neuron-plasticity (ROM), with try to encode . with attach two methods apply (a) Standard level reasoning's, numerical (b) above mention extreme level . Also its try to encode work in extreme neuron-plasticity boundary cases. 4. Also separate the reasoning's and numerical 5.Back generation best skill till presents, apply above mention 4 in experiments. 6. Brain cognition herbal top 5 with standard level reasoning think, practice.

By experiment root it confirms that which best of new successful research. After the find by experiment that's best roots apply that's of society ,race , country all type development. Also consider for experimental error to apply best logic ,both.

Its work during about 3-4 hour job period to update.

II. CONCLUSIONS

Done the experiment its 6 standard theoretical approach for scientist brain cognition which best root ? The roots mentions are 1. Complex reasoning ,numerical extreme practice without solution book as think to think like one complex reasoning give 30-45 minutes to think to think brain twist all dimensions of till the research work do but not use students to more waste of time 2. By see solution book complex numerical ,reasoning's extreme practice step understandings after the memorize practice like single time 3-4 repeat to upgrade brain software regular update till research work do 3. Use

exercise as catalyst 2 -3 hours or maximum neuron-plasticity (ROM), with try to encode . with attach two methods apply (a) Standard level reasoning's, numerical (b) above mention extreme level . Also its tries to encode work in extreme neuron-plasticity boundary cases. 4. Also separate the reasoning's and numerical 5.Back generation best skill till presents, apply above mention 4 in experiments. 6. Brain cognition herbal top 5 with standard level reasoning practice.
